

## PATIENT INFORMED CONSENT FOR TREATMENT

I hereby authorize Dr. \_\_\_\_\_ to perform Legend Pro Hybrid Energy treatment (HE)

### HYBRID ENERGY(HE)

- ▶ HE treats the skin in a fractional manner, leaving areas of untreated skin between the affected zones, for improving the healing process.
- ▶ The HE technology uses a disposable sterile treatment tip composed of ultra-thin electrodes, attached to the distal end of the HE applicator.
- ▶ The ultra-thin electrodes ablate the skin using Radio Frequency (RF) energy, inducing controlled tissue heating.
- ▶ During the treatment, some discomfort, stinging and/or heat can be sensed.
- ▶ RF's microneedles smoothly penetrate the skin, delivering energy at various depths in the epidermis and dermis to induce collagen regeneration while sparing the skin's surface. Legend Pro RF can be used to improve your skin quality by reducing signs of photo aging and photo damage, fine lines and wrinkles, stretchmarks and scars/acne scars.

It may take multiple treatments to obtain optimal results, and it is possible that the results will be minimal or not help at all.

The results may be temporary or permanent and there is no way to predict how long the results will last. Although these devices are effective in most cases, no guarantees can be made.

The procedure may result in the following adverse experiences or risks, most commonly :

- ▶ **DISCOMFORT/PAIN** – Some discomfort and/ or pain may be experienced during treatment. A topical anesthetic will be applied to your skin before treatment. Other forms of anesthesia, or pain management, may also be used.
- ▶ **SWELLING** – Swelling (edema) of the treated area is common and may occur. This usually resolves in a few days
- ▶ **REDNESS** – Redness (erythema) of the treated area is common and may occur. The erythema typically resolves in about two weeks. In case of excessive swelling, redness or heat, I may apply a cold pack (NO ice) to the area and contact my treating physician.
- ▶ **SKIN COLOR CHANGES** – During the healing process, there is a possibility that the treated area may become either lighter (hypopigmentation) or darker (hyperpigmentation) in color compared to the surrounding skin. This is usually temporary, but, on a rare occasion, it may be permanent. You should avoid sun exposure after the treatment and use sunblock.
- ▶ **MILIA/ACNE** – Ointments that occlude hair follicles, sweat ducts, or sebaceous ducts may lead to milia/acne formation. This is more common in patients with a history of cystic acne or oily skin.
- ▶ **WOUNDS** – Treatment can result in burning, blistering, or bleeding of the treated areas. It is important that you not pick or scratch the sites as this may lead to permanent scars or promote an infection. If any of these occur, please call our office.
- ▶ **TREATMENT PATTERN** – A persistent spot size pattern may be apparent on the treated skin and usually resolves with time. In rare cases, it may be permanent.
- ▶ **INFECTION** – Infection is a possibility whenever the skin surface is disrupted which can lead to scarring. Proper wound care and keeping the treated area clean are important. If signs of infection develop, such as pain, heat, blisters, or surrounding redness, please call our office
- ▶ **CONTACT/ALLERGIC DERMATITIS OR SKIN SENSITIVITY** – Potential increased sensitivity, irritation/itching or allergic reaction of the skin due to skin surface disruption.
- ▶ **SCARRING** – Scarring is a rare occurrence, but it is a possibility if the skin surface is disrupted. To minimize the chances of scarring, it is IMPORTANT that you follow all posttreatment instructions provided by your healthcare.
- ▶ **PETECHIAE** – May appear for several weeks after healing and clear without treatment.
- ▶ **DILATED PORES** – Collagen contraction that occurs as part of the resurfacing process may also contract the skin between the pores, which widens the existing pores. This occurrence, though rare, is permanent.
- ▶ **SUN EXPOSURE / TANNING BEDS / ARTIFICIAL TANNING** – May increase risk of side effects and adverse events. Avoid heat, exposure to sun and UV and apply high SPF sun screen several times a day.
- ▶ **ALLERGY** – There is a risk of an allergic reaction to the topical anesthetic.

I acknowledge the following points have been discussed with me:

- ▶ Potential benefits of the proposed procedure, including the possibility that the procedure may not work for me.
- ▶ Alternative treatments
- ▶ Reasonably anticipated health consequences if the procedure is not performed
- ▶ Possible complications/risks involved with the proposed procedure and subsequent healing period

**SKINFINITY  
MEDICAL**  
Health - Beauty - Happiness

## Legend Pro (HE) Patient Consent Form

WWW.SKINFINITYNJ.COM   

For women of childbearing age: By signing below I confirm that I am not pregnant and do not intend to become pregnant anytime during the course of treatment.

Furthermore, I agree to keep Dr. \_\_\_\_\_ and staff informed should I become pregnant during the course of treatment.

Photographic documentation will be taken. I hereby do authorize the use of my photographs for teaching purposes.

ACKNOWLEDGMENT BY MY SIGNATURE BELOW, I ACKNOWLEDGE THAT I HAVE READ AND FULLY UNDERSTAND THE CONTENTS OF THIS INFORMED CONSENT FOR THE LEGEND PRO RF TREATMENT, AND THAT I HAVE HAD ALL MY QUESTIONS ANSWERED TO MY SATISFACTION BY MY HEALTHCARE TEAM.
